Succulent & Cacti Mix

Creates the perfect growing environment for Succulents, Cacti and Bonsai

Available in 22 L bags

Better Earth Selection System

Good to grow

Certifications

Water logging and the resulting "root rot" it can cause, are common problems affecting small potted succulents. That's why Rocky Point's professional quality Succulent & Cacti Mix has been specifically formulated to encourage water drainage from potted soil.

With the added benefits of a slow release fertiliser which feeds plants, this mix has everything you need to grow sensational succulents!

Features & Benefits

- Ideal proportion between drainage and aeration
- Added fertiliser to boost plant growth
- Wetting agent to make the most of every drop
- Lightweight long term growing mix
- Used by professionals

How to Use:

Potting Succulents & Cacti:

Most plants need re-potting at least once and sometimes twice a year. Before re-potting give your plant a thorough wetting down and choose a bigger pot, at least one third bigger than the initial pot.

1. Place a small amount of Succulent & Cacti Mix in the base of the pot.
2. Position the plant in the centre of the pot; fill around edges to within 20 mm of the top of the pot with Cacti & Succulent Mix.
3. Press down gently.
4. Water in well straight away and then give a solid water once a week depending on the needs of your plant variety.

Order Code: 2-RP-BCS-22

Size: 22 L

Bags per Layer: 8

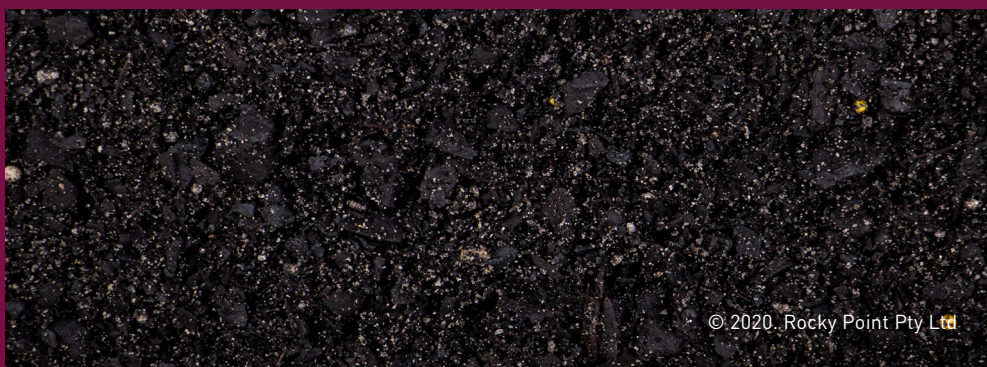

Bags per Pallet: 96
